**SPRING 2025**

**FOR BREEDERS.  
BY BREEDERS.**

# WELCOME

**Jack Laurie 0467 484 479**  
**jack@breedergenetics.com.au**

**BREEDERGENETICS.COM.AU**

As we present our 2025 Spring Sire Directory, we're proud to share a line-up that represents the very best of what Breeder Genetics stands for – providing genetics that thrive in the Australian environment and adds value across the entire supply chain. Every bull has been carefully selected, inspected, and backed by genetics that drive profitability and progress.

The past six months have brought encouraging signs forward for the Australian beef industry as global meat prices have strengthened. Recent tariff settings have tilted in Australia's favour versus key global competitors, helping lift July exports to the US and boosting 2025 North America volumes. In Asia, a rapidly expanding middle class, projected to grow from around 2 billion in 2020 to 3.5 billion by 2030 is driving stronger demand for quality beef, a trend that Australia has been, and will be well positioned to capitalise on. For the first time ever, July 2025 saw over 150,000 tons of beef exported in a single month.

On the domestic front, cattle markets have maintained a steady tone through winter, with saleyard prices trending higher despite seasonal fluctuations across the eastern seaboard. While seasonal variability has influenced management decisions in many regions, the south has benefited from timely rainfall, driving pasture growth and kickstarting herd rebuilding efforts.

Processor demand has remained firm, particularly for well-finished slaughter cattle, while feeder markets have lifted as lotfeeders are positioned for strong grain fed supply programs heading into summer. The message is clear, the conditions are set for opportunity, and a rising tide lifts all boats!

With this positive backdrop, the focus turns to sires that can add value where it counts. This spring, we unveil a new bull from the US, **Henke Honcho**, a structurally elite, deep, long bodied and wide-based sire, combining calving ease, growth, and fertility with exceptional foot and leg structure, backed by generations of proven, long-lived cows. We also introduce our first Brangus sire, **MSC Blanton 889K7**, a true phenotypic standout and complete all-rounder combining calving ease, high growth, positive fats, marbling, big ribeye in a structurally sound package. The Autumn season was dominated by the 2024 American semen sales leader, **Basin Keystone 2021** and Australia's new star that redefines phenotype and genotype, **Cluden Newry Uppercut U15**.

Our sires, shaped by global insights and experiences, are prepared to address the constant evolving demands of Australian beef production. As we enter the Spring 2025 season, our mission remains clear: **For Breeders, By Breeders.**

*Cheers, Jack Laurie*

# ABOUT US

At Breeder Genetics, **we personally inspect all bulls we market**, travelling to research the herds and female lines they originate from. This commitment ensures that breeders have all the detailed information needed to make a well-informed decision. Our focus is on selecting bulls that will excel in varied Australian environments and perform within the Australian market.

Breeder Genetics was founded in 2019 by Jack Laurie, a sixth-generation cattle breeder with a deep passion for beef cattle and genetics. Jack holds a degree in Rural Science from the University of New England and is committed to balancing phenotype with solid breeding principles, enhanced by data-driven practices.

As a 100% Australian-owned and operated beef semen company, Breeder Genetics is dedicated to providing premium genetics tailored to the diverse needs of the Australian production system. Jack's travels across Australia, the US, Canada, New Zealand, and Europe have given him insight into a variety of breeding practices and operations.

With a dedication to building strong client relationships grounded on trust and shared goals, Breeder Genetics focuses on understanding the unique needs of each breeder. We are committed to advancing the industry and continually improving breeding outcomes, ensuring that our clients achieve long-term success within their operations.

# MATURE BODY COMPOSITION

Each year, Angus Australia advances the genetic evaluation by updating the TransTasman Angus Cattle Evaluation (TACE). For 2024, this includes the addition of two new traits: Mature Cow Height (MCH) and Mature Cow Body Condition (MBC). Previously categorised as research breeding values, these traits are now full Estimated Breeding Values (EBVs). The heritability of these traits is 0.51 for MCH, 0.21 for MBC, and 0.43 for Mature Cow Weight (MCW), demonstrating that genetic selection can drive meaningful change.

Importantly, these three traits are genetically correlated. MCW is highly correlated with both MCH (0.83) and MBC (0.87), while MCH and MBC have a weak correlation of 0.21. This means that cows can achieve similar weights through different combinations of height and body condition. This is especially important when selecting sires, as it highlights the need to look beyond weight alone and consider the balance between frame size and body condition.

Historically, carcass Rib & Rump Fat EBVs have long been used as a proxy for selecting softer, easier-fleshing females with additional fat cover. MBC EBVs now provide a trait specifically designed for this selection pressure. The correlation between MBC and carcass Rib & Rump Fat EBVs is weak, at 0.3 and 0.19 respectively, indicating that while there is some genetic relationship, these traits uniquely describe different aspects of fat composition. If your breeding objective is to influence the body condition score of mature females, the MBC EBV is the most direct and effective tool for driving that change.

BASIN KEYSTONE 2021

ID USA20322583 • DOB 11/1/22  
OWNED BY BASIN ANGUS RANCH, PINE CREEK ANGUS RANCH

- Keystone sold for a valuation of \$202,500 USD as the top-seller for Basin Angus in the spring of 2023 selected by Lyle Weiss from Pine Creek Angus Ranch in South Dakota. Later in the year, his full sister sold as the \$70,000 USD top-valued bred heifer of the phenomenal 2023 Basin Angus female sale.
- Dam, Joy 9140 recently sold for \$240,000 USD and is also the mother of the \$600,000 USD Basin Jameson. Sire, Step Up 9178, has consistently stood out as a leading sire group during recent visits to America. Keystone unites Basin Angus' most valuable cow families, the Joy's and Lucy's, with his great granddam, Basin Joy 1036, renowned as the dam of the female making sire, Basin Rainmaker 4404. Keystone anchors an elite line of outstanding females.
- Keystone is a mid-maturity pattern bull, exhibiting exceptional volume and mass with a very docile nature. He is long-bodied, smooth-fronted, deep-bodied, and structurally correct, with a strong foot structure. As ORigen's top-selling semen sire for 2024, Keystone delivers the performance, maternal power, and a data set essential for modern breeding programs.

HENKE HONCHO

ID USA20462799 • DOB 14/9/22

OWNED BY BALDRIDGE PERFORMANCE ANGUS

- The standout young sire from our June 2025 US trip and easily one of the most complete bulls we inspected. Honcho demands attention for his sire appeal, Angus character, and combination of length, growth, and functional build.
- He was the top seller at the 2024 Henke Angus sale, selling to Baldridge Angus, where he has since been used heavily. Upon inspection, his foot shape and depth is ideal, as well as his angle and set to his hock. He moves with impressive ease and agility and has a calm, easy-going nature.
- His great-granddam lived to be nearly 16 years of age, and his granddam is still active as an 11 year old. His dam, Blackbird 0215, had Honcho as a first calf heifer, but sadly passed unexpectedly after her second heifer calf, who has been retained in the herd. Note, top 10% for Teat, top 25% for Udder and top 25% for Functional Longevity. See pages 25-26 for more details.
- Honcho's pedigree is stacked with proven maternal and performance sires, and we expect his daughters to reflect the same maternal strength, especially udder quality, as seen in the Blackbird cow line. His width, structure, and muscle expression, matched with his longevity and maternal backing, make him a unique prospect this season.

BASIN TRUE VALUE 3017

ID USA20622753 • DOB 11/1/23  
OWNED BY BASIN ANGUS, MARKOTA ANGUS, ROONEY ANGUS

- True Value sold for a valuation of \$112,500 USD in 2024 and has been extensively utilised in the Basin Angus herd and by his new owners in Colorado, Montana, Nebraska, Ohio, and Wisconsin. He was the high selling bull from the True Grit sire group, which achieved the highest average of any sire group at the 2024 Basin Angus sale.
- True Value is a calving ease bull with exceptional length, depth, and muscle expression, combined with a structurally correct and highly functional build. His fluid movement and unique pedigree stacks generations of elite Basin Rainmaker genetics. His dam, Lucy 1177, a young donor within the Basin program, produced True Value as a first-calf heifer. Double bred to the renowned cow-maker Rainmaker 4404, True Value is expected to sire exceptional daughters.
- His data profile emphasises maternal excellence, blending calving ease, growth, fertility, and foot quality. While not extreme in any single trait, few bulls rival his balanced data across production, management, and maternal traits.

LEARN MORE

- Uppercut has been identified as one of the most complete bulls to be bred on Australian soil, seamlessly blending phenotype and genotype. Recently selling to McKenzie Agriculture for \$275,000, he sets a new benchmark for modern-day Angus breeders with one of the most powerful data profiles in recent times.
- Uppercut brings soft skin, extra muscle shape with a long and deep body to the table. He stands on solid feet with a strong depth of heel. Out of a first calf heifer, dam, S233, is a wide based, well uddered female, showcasing where uppercut gets his extra shape and power from.
- With one of the most modern and impactful data profiles, Uppercut excels in offering breeders a unique blend of functionality, power, and genetic value. A true example of phenotype and genotype working in harmony, he is a must use sire for 2025.

# DEEP CREEK LEGITIMATE 203

ID USA20509691 • DOB 5/1/22

OWNED BY HOOVER ANGUS, MOON CREEK FARMS, HANSINE RANCH

- Legitimates pathfinder grandam and great grandam each have 10 calves on record, signaling strong longevity, fertility, and productivity - foundational to commercial cattlemen.
- "From the time he hit the ground, we knew he had the potential to be great. Extreme length, depth of flank, extra chest floor, and he stands on a great foot. He rose to the top and earned 'Lot 1' status in the 2023 Deep Creek sale, where he garnered \$105,000 with progressive cattlemen winning the bid as well as being the contending bidders." - TJ Gabriel, Deep Creek Angus Ranch
- Legitimate's dam is a beautiful four-year-old that is easy keeping, broody, nice uddered, and has a bright future ahead of her. legitimate. That's his name, that's what he is, and that's the program he comes from!

# KNOWLA SO RIGHT S48

ID BLA21S48 • DOB 1/3/21

OWNED BY SPRYS ANGUS & COTTAGE CREEK ANGUS

- So Right was the \$190,000 selection at the 2022 Knowla Livestock Production Sale, where 8 Alternative E125 sons averaged just under \$50,000. So Right has a tremendous amount of spring and depth of rib, stoutness and muscling, all being clean fronted with a great ability to move effortlessly with presence and eye appeal.
- The cow power behind So Right is unmatched, mother entering the donor program, already having two daughters in the donor pen alongside her. So Right is a great grandson of Designer V96, who is arguably the best cow to walk at Knowla. The longevity in the pedigree is outstanding, expect So Right daughters to last the test of time.
- His first calves are in the weaning yard, being thick with extra muscling and weight. When you analyse the phenotype and structure of the bull, his amazing temperament, the cow power behind him, and the data set he brings to the table, So Right S48 is the complete package.

- Prime Minister, the top-selling bull from Dunoon Angus in 2020, commanded an impressive \$140,000 and claimed the title of highest-selling Angus bull for that year.
- Renowned for his exceptional top-end performance and elite genetic profile, he excels in thickness, capacity, docility and overall structural soundness.
- The first Prime Minister progeny sold in 2022 achieving strong results wherever they were offered and continued to top sales in 2023 and in 2024. His first daughters, now in production, exhibit clean front ends, well-formed udders, and the powerful phenotype you expect of their sire.
- With a proven breeding track record of success, Prime Minister presents an exceptional opportunity for breeders seeking to enhance their bottom line in a well proven package.

OWNED BY HOOVER ANGUS, LARRY HOHERTZ

LEARN MORE

- Finally, a calving ease, low birthweight Hoover No Doubt son from the best cow family at Hoover Angus! He is an easy choice to use on heifers and not sacrifice thickness, power, and growth at weaning time!
- His dam is a beautiful uddered, moderate cow with a 349-day calving interval, indicative of the superior fertility in his cow family. Great grandam, G366, is regarded as the best and most influential cow in Hoovers 95-year history. At least 15 of her daughter descendants have served as donors at Hoovers. Granddam, N54, has a perfect 365-day calving interval, despite stealing several flushes over the years.
- About It is an attractive, smooth made bull that is really long, big hiped, thick, and has the muscle you would expect from No Doubt.

DUNOON DATA PLUS S603

ID BHR21S603 • DOB 10/8/21

OWNED BY SPRYS ANGUS & COTTAGE CREEK ANGUS

- Dunoon Data Plus S603 was selected by Sprys & Cottage Creek Angus for \$125,000 for his exceptional structural integrity, softness, docility, and ability to promote calving ease while maintaining a balanced, modern, growth curve.
- Data Plus scored perfect 5's for front and rear claw shape and heel depth with a 46cm scrotal. True to his name, Data Plus offers much more than meets the eye!
- Out of a two-year-old heifer, dam Q226 is a clean fronted, square made, big hipped, good uddered female that has risen to the top of the 'Q' draft of females at Dunoon. From the esteemed Princess cow family at Dunoon, dating back to the matriarch Dunoon Princess X9, has a storied history of producing influential semen sires and top-selling bulls.
- Data Plus has added length and depth of body, superior freedom of movement in an easy doing, docile, structurally sound package. His data profile stands unmatched for his combination of calving ease, short gestation, birth to growth spread, fertility, docility, softness, marbling and structure.

# CONNEALY WAY MAKER

ID USA19739553 • DOB 10/4/19

OWNED BY GRIMMIUS CATTLE

- Way Maker was the highlight bull on the June 2022 American trip. He was the top selling bull in the 2020 Fall Connealy Bull sale, commanding \$70,000.
- Way Maker ticks all the boxes. He will inject functionality, muscle, thickness, length, softness, docility, and sound structure into any cow herd. Way Maker ratioed 112 at weaning, 113 at yearling, 102 for EMA and a whopping 157 for IMF in a 400 + contemporary.
- The dam of Way Maker is a very functional female with an excellent udder, the type of cow we would all like to have in the front paddock breeding bulls. With the first calf drop being the standouts at Connealys, Way Maker is continually being heavily used at Connealys. With an outcross pedigree and the performance to match, Way Maker is one not to miss!

LT CLARION 9054

ID USA19548517 • DOB 26/2/19

OWNED BY THIEL RANCH, TYRELL & KARI DIETERS

- Phenotypic superstar with flawless structural soundness, Clarion commands attention from every angle. He's a powerhouse, showcasing impressive muscle, base width, and a clean fronted, smooth-shouldered profile with added length.
- Dam, LT Forever Lady 7038, is a maternal masterpiece at Thiel Ranch. She has produced several other sires as well, including the \$95,000 LT Chiefton 1440 at Frederickson Ranch & Kovarik Cattle Co., and the \$45,000 LT Chosen 2132, a resident herd sire at Montana Ranch and Koupal's B&B Angus. Clarion's daughters are expected to lead the front pen with exceptional udders and maternal strength
- His progeny are impressive and are standouts in their contemporary groups. The owners have shared that "progeny have a tremendous amount of thickness, depth of body and an attractive profile. He has worked well in any mating we've put him in and has a very bright future in our operation!". If you are looking to add some power back into your cowherd while maintaining excellent maternal traits, Clarion is your bull.

# BALDRIDGE VERSATILE

ID USA19563587 • DOB 24/4/19

OWNED BY STEVENSON ANGUS RANCH, SOUTHARD LAND & CATTLE, BALDRIDGE PERFORMANCE ANGUS

LEARN MORE

- The \$250,000 USD son of Blackbird A030 who has written her name into the history books at Baldridge. Maternal brother to the high use sires Alternative and Command. The entire flush of 6 brothers averaged \$64,000 USD and 10 sons of Blackbird A030 averaged \$42,350 USD in the 2021 Baldridge Performance Bull Sale.
- Versatile combines docility and marbling, being a trait leader for both traits. His progeny are soft, easy-fleshing cattle with extra body length that converts to added weight. Sons in Australia have sold to \$100,000 and \$90,000.
- He is a long and deep bodied bull that is free moving and expresses great sire appeal.

- At last, the Paratrooper son the industry has been searching for! Shenanigans S654 boasts an abundance of red meat backed by a B- muscle pattern, yet he exudes a softness complemented by an exceptional skin and hair type. Added body length, mass, and volume combined with depth of thigh and flank.
- Dam, Rosebud N117 epitomises the ideal Angus cow, seamlessly combining body length and power with excellent foot structure and udder design. N117's first natural calf fetched \$55,000, while her initial seven offspring sold at auction, averaged an outstanding \$28,000. Furthermore, a full sister to N117 achieved an Australian record for a yearling heifer at auction, receiving a remarkable \$140,000, with the set of eight full sisters averaging \$30,250.
- Shenanigans' pedigree stands as a testament to its reliability and genetic predictability. This is the most significant stride forward in the Paratrooper lineage, seamlessly merging phenotype, maternal prowess and longevity into a comprehensive data package.

- Realist is a bull that will put functionality back into cattle with a very balanced set of data. He covers all the basics then adds so much more.
- His family line is the most prolific cow family at Karoo, with his dam and grand dam combining over 70 head of progeny.
- Realist was one of the most complete bulls to sell in the 2019 sale season, who will add softness, shape, structural soundness and docility.
- Realist calves are born early, exhibiting early growth, flawless phenotype, and showing added length and presence. The best with Realist is just coming to life now, with his first daughter calving - great young females.

- Rocky sold for \$130,000 to Kelly Angus, Gilmandyke Angus, Dunoon Angus and Knowla Livestock. Rocky commands your attention with his sire appeal and overall balance in an attractive, well-made package.
- Rocky was 34kg born out of a maiden heifer P4005, who is a functional female, with a picture perfect udder.
- His progeny are long-bodied and soft-skinned, presenting a stylish package. The first females are now calving, showcasing beautiful udders, refined fronts, and exceptional mothering abilities.

Traits Observed: Genomics

- One of the most exciting sires Musgraves have bred, Rob Roy blends two of the breeds greatest cow families into one pedigree.
- Rob Roy is a heavy muscled, stout boned bull with the foot quality and attractiveness to match. He bred 46 wet two-year-olds at Musgrave this spring and held his condition remarkably well.
- His dam is one of the best females at Musgraves and is fault free in her design. She has been flushed extensively this year, as they receive the first calves by Rob Roy.
- A larger framed, powerful version of his sire, get in on the ground floor of genetic progress with Rob Roy.

- Monty was purchased by Glenisa Angus as the top selling bull from the 2018 Knowla Sale.
- He was a crowd favourite and arguably one of the best bulls to come out of the Knowla herd.
- Monty is backed by a prestigious donor cow within the Knowla herd, who is regarded as one of their best cows.
- He is an extremely sound bull with a heap of power. His progeny display excellent capacity and overall thickness.
- The Montys are easily found in the paddock.

Traits Observed: Genomics

- Sterling Confidence Plus 804 rose to the top at Snyder's Bull Test in 2019. He was #1 for ADG at 2.41 Kg/day, #1 for RFI at -3.84 and #1 for FCR at 4.51:1.
- He is a moderate framed, easy fleshing bull. His temperament, fertility and eagerness for his job have made him a favourite at the semen collection facility. He is a good footed, free moving, sound bull.
- He has been an excellent choice for maiden heifers. His calves are light and vigorous at birth and get right up and grow. He has tremendous maternal strength behind him. His dam is a maternal sister to the incomparable Baldrige Isabel Y69.
- Sterling Confidence Plus 804 daughters reach puberty early and breed early in the season. They are attentive mothers with fantastic udder structure.

# SPRYS GOLDENROD P39

ID GLSP39 • DOB 24/6/18

OWNED BY SPRYS SHORTHORNS, OUTBACK SHORTHORNS

- Goldenrod P39 has outstanding phenotype, very well balanced with excellent structure, great disposition and feet coupled with a very good set of EPD data, tested in a Homozygous Polled package.
- His scrotal was measured in April 2020 at 43cm and he was born at 33kg.
- His dam, Sprys Miss Buddy M36, is the all-time Australian Shorthorn highest price record holder, selling for \$95,000. She is medium framed, structurally very sound with an excellent udder construction and teats.
- Progeny are born early and small, then have the vigor to get up and grow. Sons have already topped sales around the country.

- MSC Blanton 889K7 is a complete all rounder backed by some of the most elite Brangus genetics. Inspected and identified on our June 2025 USA trip, he was a true phenotypic standout – slick coated, structurally sound, with a serious amount of meat & muscle!
- Built from a powerhouse pedigree including sires like Monument, Profit, Boulder, Overload and Rockstar. Combines the breed’s most respected maternal lines – 8889P4, 541U, 111U25 & 403Y – into one complete genetic package.
- Blanton represents next-level performance for calving ease, growth, positive fats, marbling and ribeye area. Blanton 889K7 brings both elite phenotype and function – a bull that ticks all the boxes!

# AMERICAN MATERNAL EPDS

*In May of 2025 the American Angus Association released 3 new maternal EPDs, Functional Longevity (FL), Teat Size (TEAT) and Udder Suspension (UDDR) to better describe maternal traits within Angus cattle.*

## **FUNCTIONAL LONGEVITY**

Functional Longevity (FL) is a key maternal trait indicating a cow's ability to remain productive in the herd. The FL EPD predicts the number of calves an animal's daughters will produce by six years of age, with higher values reflecting greater longevity. Data included in the evaluation are from females from ages 2 to 10 years old born after 1990 who calved as a 2-year-old female. Despite being lowly heritable (0.09), it is based on over 8.7 million records!

## **TEAT SIZE AND UDDER SUSPENSION**

Teat Size (TEAT) and Udder Suspension (UDDR) are both scored on a scale from 1 to 9, where a score of 1 represents a very large and misshapen teat, or a very pendulous udder, while a 9 indicates a very small teat size or a very tight udder. Ideally, cows are assessed within 24 hours of calving, and over 180,000 records have now been collected for the development of TEAT and UDDR EPDs.

These EPDs predict the teat and udder structure of a sire's daughters, with higher values indicating smaller teats and improved udder suspension. The traits have a high genetic correlation (0.77), and both teat size and udder suspension are moderately heritable at 0.32 and 0.28, respectively. While higher scores generally represent improved structure, balance should be prioritised over extremes.

**Research Breeding Values** can be utilised in exactly the same manner as EBVs. They are subject to greater potential change than the EBVs routinely reported in the TACE analysis, as improvements are made to the analytical models that are used to calculate them, and as additional performance information is collected for the trait. Research Breeding Values should consequently be used with some caution when making animal selection decisions.

# THE BUSINESS OF BULLS

@breederexchange

podcast

The Breeder Exchange Podcast is produced by Breeder Genetics, an Australian Bovine Semen company. The podcast uncovers the story of the leading sires in the Breeder Genetics program and aspires to educate the world about all things beef.

The guests on the podcast include reputable individuals from successful breeding programs globally and professionals from all areas that contribute to our industry.

## WORLD ANGUS FORUM

Interview from the World Angus Forum – Jack Laurie, Robert Gilchrist, Darryl Stevenson, and Mark McCully, delves into the landscape of the Angus cattle industry.

## MCKENZIE AG SERVICES

*Lachie McKenzie*  
Interview with Lachie McKenzie of McKenzie Ag Services covering the multifaceted aspects of his business, from animal nutrition consulting to feed manufacturing and sourcing.

## AAM

*Garry Edwards*

Interview with AAM Founder & Managing Director, Garry Edwards, as he breaks down the world of investment companies, their role in agriculture, and how he built a \$1B enterprise from humble family farm beginnings.
